Comments about Tutoring Services

Online tutoring works a lot different than in person, even though there have been some kinks in the plans, everything has been very helpful and very accommodating.

Tutoring services was able to connect me with a tutor within just a day of my first tutor resigning early in the semester. This helped me to recognize that tutoring services is doing their best to help students succeed.

The tutoring service was amazing. I was a little hesitant at first to get tutoring because I never needed it before, but I am very glad that I took it on. It helped my grade so much.

I really enjoy that you offer these services for an affordable rate, so I don’t have to worry about passing my tough classes. It also helps me get more exposure to the class materials throughout the week and makes me stay on track, so I don’t fall behind in these online classes this semester.
